

Daniyar Suleimenov

Backend Engineer — Almaty / Remote

daniyar.s.fake@example.com · +7 700 000 0044 · github.com/daniyar-fake

Summary

6 years backend. Last 2 years at a crypto exchange working on order matching and settlement. Strong **Go**, comfortable with PostgreSQL and revenue-critical on-call. Open to relocation to Singapore.

Experience

Backend Engineer — Tengri Exchange

2023 – present

- Order matching engine in **Go**; built the settlement service and the ledger writes that back it.
- Weekly on-call for revenue-critical infrastructure.
- Some exposure to fiat on/off ramps (USD, EUR, KZT) — not SE Asia payment rails.
- Designed a reconciliation job comparing internal ledger against exchange counterparty statements.

Backend Engineer — Steppe Logistics

2020 – 2023

- TypeScript / Node services for fleet management.
- PostgreSQL with heavy use of geospatial extensions.

Junior Backend Engineer — Aralsoft

2019 – 2020

- Internal CRM tooling; Python and Postgres.

Education

B.Sc. Computer Science, Kazakh-British Technical University (KBTU), 2019.

Skills

Go, TypeScript, PostgreSQL, Redis, AWS, gRPC, Kafka. Russian (native), Kazakh (native), English (fluent).
