

Priya Achuthan

Software Engineer — Bengaluru

priya.a.fake@example.com · +91 80 0000 0055 · linkedin.com/in/priya-a-fake

Summary

4 years of backend engineering at an Indian fintech. Worked on UPI flows and reconciliation tooling against bank settlement files. Eager to take on more ownership and a tech-lead-track role.

Experience

Backend Engineer — Tilakpay (Bengaluru)

2021 – present

- TypeScript / Node services for **UPI** collections and refunds.
- Built reconciliation jobs against partner bank settlement files in **PostgreSQL**.
- **Shared** on-call (not lead) — rotating with 3 other engineers.
- Mentored 1 intern through their final-year project.
- Some basic **Go** on an internal idempotency-key service.

Associate Engineer — Bharat Tech Services

2020 – 2021

- Java + Spring internal tooling for a logistics customer.

Education

B.E. Information Science, RV College of Engineering, Bengaluru, 2020.

Skills

- TypeScript, Node, PostgreSQL.
- AWS (Lambda, RDS, S3).
- UPI rails, NPCI specifications.
- Basic Go.
- Languages: English, Tamil, Kannada.
